

CORPORATE PERFORMANCE MANAGEMENT BUSINESS ANALYTICS

Visualise, collaborate and act on your information, your way

KEY FEATURES AND BENEFITS

- Make decisions on the go, with adaptive dashboards that are intuitive and easy to use from any device
- Collaborate and share information in an engaging and easy to consume format
- Choose from a wide variety of contemporary and adaptable visualisations to analyse information
- Personalise dashboards to consume information in the way you prefer
- Drill down into live information and take immediate action
- Reduce cost, risk and time with pre-configured dashboards

Empower teams to analyse information, their way

Increase access to real time business information across your organisation for better decision making. See beyond basic numbers and explore and analyse rich information, using a wide variety of visualisation types.

Users are empowered to modify and create their own dashboards with simple and intuitive design tools, reducing dependence on technical resources.

Make decisions on the go

Purpose-built for the mobile world, whether it's a smartphone, tablet or desktop device, the software adapts to ensure a seamless and intuitive user experience. With the ability to drill down and act on insights immediately, you can work on the go, from anywhere.

Improve collaboration

Users can share dashboards to collaborate and improve organisational alignment. For example, team leaders can easily create curated dashboards and share them with their team to monitor relevant KPIs. Contributors can add comments to flag anomalies to management.

Harness the power of an integrated ERP to take immediate action

Drill down through dashboards to act on your enquiries on the spot. For example, a recruiter can quickly view vacancies and click through from the dashboard to raise a requisition to recruit. Similarly, an accounts officer can drill down from a creditors dashboard and put invoices on hold. No need to jump in and out of different software solutions to act on insights.

This immediate action is only possible through the power of an integrated, enterprise approach to managing your business.

Rapidly deploy pre-configured dashboards

Get up and running quickly with pre-configured dashboards for a fraction of the cost of implementing traditional business intelligence solutions. Templated dashboards currently available include financial performance and debtors/creditors summaries.
